

OLTIN YO'L GTL

Safety, Health, Environmental, Risk & Quality Policy

The mission of OLTIN YO'L GTL is to create a sustainable business with no harm to people while being responsible to the environment.

We are committed to:

- The health, safety and security of our employees, contractors and the public affected by our operations and protection of the environment.
- Increase investment in the environmental and social field. The company intends to maintain a fruitful collaboration with international government and non-government organizations, research and educational institutions which conduct efficient work in the field of environmental and social security.
- Ensure that Safety, Health, Environmental and Security risks are managed by pro-actively applying Best Practice standards and Inherent Safe Design in our activities and implement a formal, auditable, Safety, Health, Environmental, Risk and Quality Management Systems.
- Continually improving and managing our safety, health, environmental and quality performance.
- Complying with all applicable legal, agreed best practice requirements and standards.
- Engage with stakeholders on relevant health, safety, environmental and risk matters.
- Have contingency plans in place to deal with emergencies involving our operations and products.
- Inform and train all employees and contractors on safety, health, environmental, security and quality matters and ensure adherence to these requirements.
- Provide the resources to implement this policy.

This policy applies wherever we do business.

We, the employees of OLTIN YO'L GTL, agree to live by the SHERQ policy.

Technical Director of OLTIN YO'L GTL will ensure conformance with the SHERQ policy and be responsible for its execution.
